CreateSpace Independent Publishing Platform. Paperback. Book Condition: New. This item is printed on demand. Paperback. 26 pages. Dimensions: 9.0in. x 6.0in. x 0.1in. Christmas Summary Classics This series contains summary of Classic books such as Emma, Arne, Arabian Nights, Pride and prejudice, Tower of London, Wealth of Nations etc. Each book is specially crafted after reading complete book in less than 30 pages. One who wants to get joy of book reading especially in very less time can go for it. About The Book James Clerk Maxwell, the first professor of experimental physics at Cambridge, was born at Edinburgh on November 13, 1831, and before he was fifteen was already famous as a writer of scientific papers. In 1854 he graduated at Cambridge as second wrangler. Two years later he became professor of natural philosophy at Marischal College, Aberdeen. Vacating his chair in 1860 for one at Kings College, London, Maxwell contributed largely to scientific literature. His great lifework, however, is his famous Treatise on Electricity and Magnetism, which was published in 1873, and is, in the words of a critic, one of the most splendid monuments ever raised by the genius of a single individual. It was in this work that he constructed his famous theory of electricity in which action at a distance should be replaced by action through a medium, and first enunciated the principles of an electro-magnetic theory of light which has formed the basis of nearly all modern physical science. He died on November 5, 1879. For more eBooks visit www.kartindo.com This item ships from La Vergne, TN. Paperback.
