It is with great pleasure that I offer my reflections on Professor Anthony N. Michel s retirement from the University of Notre Dame. I have known Tony since 1984 when he joined the University of Notre Dame s faculty as Chair of the Depart- ment of Electrical Engineering. Tony has had a long and outstanding career. As a researcher, he has made im- portant contributions in several areas of systems theory and control theory, espe-cially stability analysis of largescale dynamical systems. The numerous awards he received from the professional societies, particularly the Institute of Electrical and Electronics Engineers (IEEE), are a testament to his accomplishments in research. He received the IEEE Control Systems Society s Best Transactions Paper Award (1978), and the IEEE Circuits and Systems Society s Guillemin-Cauer Prize Paper Award (1984) and Myril B. Reed Outstanding Paper Award (1993), among others. In addition, he was a Fulbright Scholar (1992) and received the Alexander von Hum- boldt Forschungspreis (Alexander von Humboldt Research Award for Senior U.S. Scientists) from the German government (1997).
