Asia's rise over the past four decades is one of the most significant geopolitical and geoeconomic developments in world affairs as evinced by China's, and more recently, India's, accelerated economic growth. Yet the conventional narrative of Asia's rise is incomplete, if not misleading, given the fundamental dichotomy that defines contemporary Asia: a region with unparalleled economic success but also home to the world's most dangerous, diverse, and divisive security, military, and political challenges. How the strategically consequential Asian states manage to ameliorate or even overcome traditional geopolitical tinderboxes across the Taiwan Strait, the Korean Peninsula, and the Indian subcontinent and new zones of strategic competition such as the South China Sea is to going to have a profound impact on the shaping of regional order well into the 21st century.
