

## Study of Potential Cost Reductions Resulting from Super-Large-Scale Manufacturing of Pv Modules (Paperback)

Filesize: 2.61 MB

### ***Reviews***

*Great e book and helpful one. It really is writter in straightforward terms and not hard to understand. You can expect to like how the blogger write this book.*

## STUDY OF POTENTIAL COST REDUCTIONS RESULTING FROM SUPER-LARGE-SCALE MANUFACTURING OF PV MODULES (PAPERBACK)

To get **Study of Potential Cost Reductions Resulting from Super-Large-Scale Manufacturing of Pv Modules (Paperback)** PDF, you should access the web link listed below and download the ebook or get access to additional information which are highly relevant to STUDY OF POTENTIAL COST REDUCTIONS RESULTING FROM SUPER-LARGE-SCALE MANUFACTURING OF PV MODULES (PAPERBACK) book.

Bibliogov, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Hewlett Packard has created a design for a Solar City factory that will process 30 million sq. meters of glass panels per year and produce 2.1 - 3.6 GW of solar panels per year-100x the volume of a typical, thin-film, solar panel manufacturer in 2004. We have shown that with a reasonable selection of materials, and conservative assumptions, this Solar City can produce solar panels and hit the price target of \$1.00 per peak watt (6.5x - 8.5x lower than prices in 2004) as the total price for a complete and installed rooftop (or ground mounted) solar energy system. This breakthrough in the price of solar energy comes without the need for any significant new invention. It comes entirely from the manufacturing scale of a large plant and the cost savings inherent in operating at such a large manufacturing scale. We expect that further optimizations from these simple designs will lead to further improvements in cost. The manufacturing process and cost depend on the choice for the active layer that converts sunlight into electricity. The efficiency by which sunlight is converted into electricity can range from 7 to 15 . This parameter has a large effect on the overall price per watt. There are other impacts, as well, and we have attempted to capture them without creating undue distractions. Our primary purpose is to demonstrate the impact of large-scale manufacturing. This impact is largely independent of the choice of active layer. It is not our purpose to compare the pro s and con s for various types of active layers. Significant improvements in cost per watt can also come from scientific advances in active layers that lead to...
